

Hahnemühle

Hahnemühle FineArt Inkjet Photo Cards

Preparation

STEP 1 On a sheet of proofing paper (approx. 160gsm is best, at least A4 in size), print the template – this will be your template for the Photo Card.

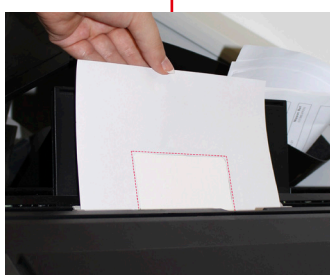

Photoshop Settings

STEP 2 In Photoshop, insert a 3mm bleed around the image (10 x 15 cm) that will be printed.

Attach to Template

STEP 3 Line up a blank Photo Card on top of the template with a double sided tape. Use tape that is removable, and acid and softener-free.

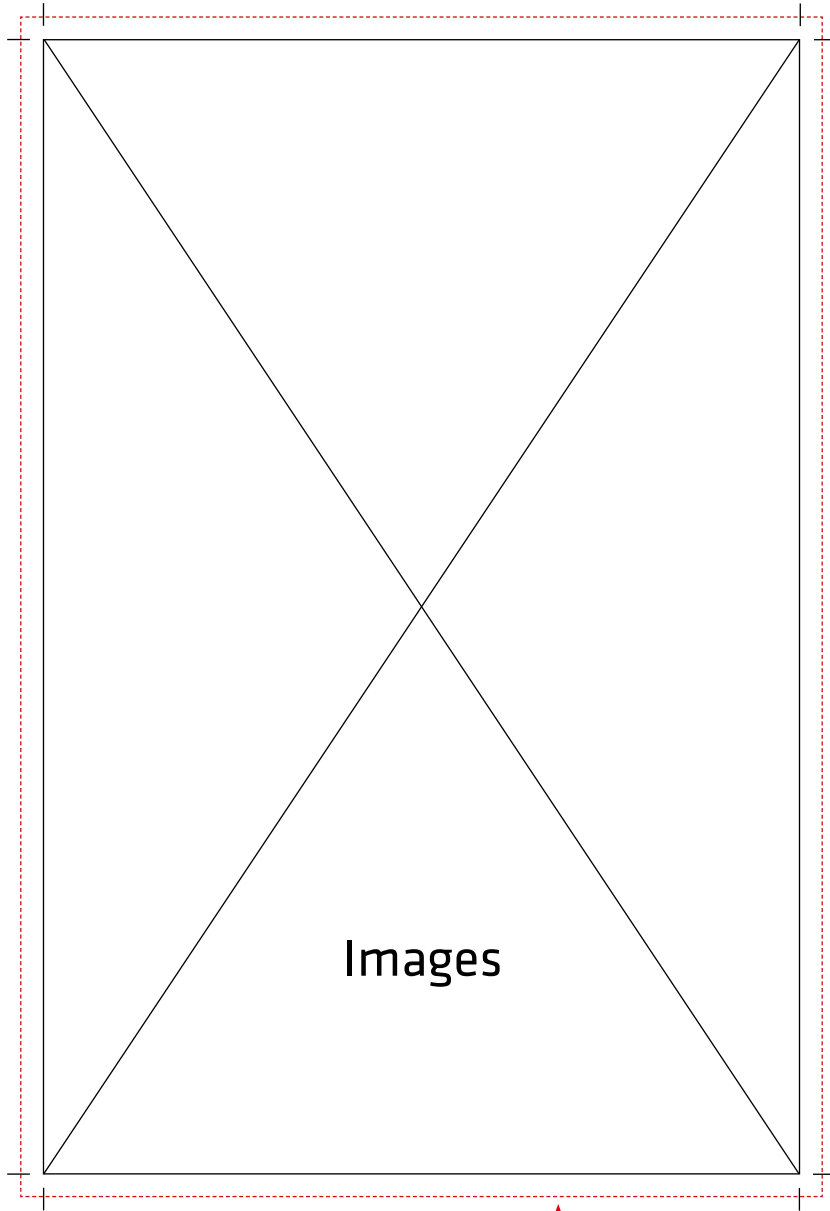

Print

STEP 4 Insert the template with the fixed Photo Card in the manual universal feeder of the printer and start printing. Your image should be lined up perfectly because of the template.
